

Memo from

JOSHUA LEDERBERG

To: Dr Russell Lee  
Palo Alto Medical  
Clinic

FEB 9 1976

It was a treat to have such a good chat with you the other night. I have given some thought to "sick societies", and the model of some resonances between individual psychopathologies, and defects in power and communication structures of the social groups; but I could not find anything noteworthy in my own writing.

A pragos psychology in history; you may want to see the Winter 1971 issue of Daedalus for a critical perspective. And you may be edified by Peter Burke (on Lucien Febvre), "A new kind of history."

Yours,  
J. Lederberg
